Cable tester for RJ11/RJ12/RJ45

Product Code:
10.31.0301

EAN:
8433281001275

Description:
Automatic cable tester designed to verify the integrity and correct configuration of cables with RJ11, RJ12, and RJ45 connectors.

Especifications:
Suitable for testing cables with RJ11, RJ12, and RJ45 (UTP and FTP) connectors. Perfect for structured cabling installation, facilitating connection verification in network infrastructures. Detects faults in seconds without the need for additional tools. Simplifies the testing process with a single button. LED lights make it easy to identify disconnected cables, incorrect connections, and loop-back tests. The remote unit is integrated into the main unit and allows testing at a distance of up to 182.88 meters, making it ideal for large installations. Includes a protective zippered case for easy transport and safe storage. Standards: RoHS Functionality Test: 100% tested

Package content:
1 x Tester + Protective Case

Package Information:
Retail box Weight approx.(kg): 0,19 Measures approx.(mm) high/wide/long: 110/180/30
